DETAILED ACTION

Response to Communication(s)

1. This office action is in response to the RCE filed on July 22nd, 2008. Claims 17-18 and 21-27 are canceled. Claims 1-16 and 19-20 are now pending in the application.

Allowable Subject Matter

2. Claims 1-16 and 19-20 are allowed. The following is a statement of reasons for the indication of allowable subject matter:

Many references in the art disclose the method, apparatus and system for transmission data packet through physical connection by using flits. Most of those references disclose about interface with virtual channels, where packets are composed into flits based on the priorities for transmitting over different channels, such as that found in Fischer et al. [U.S.5,001,472]; Joseph et al. [U.S. 6,628,615]; Kavipurapu, Gautam [U.S.6,009,488]. But no prior art reference disclose or suggest an apparatus (see claim 6), system (see claim 14) or method (see claim 11) by using different controllers in each node for alternately transferring flits through channels across the physical connection, “*in response to determining that a flit being transferred by the other channel is the end of a packet.*” structurally and functionally interconnected with other limitations in a manner as recited in claims 1-5, 7-10, 12-13, 15-16 and 19-20.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Joseph et al. (U.S. 6,628,615), **Kavipurapu, Gautam** (U.S. 6,009,488) and **Fischer et al.** (U.S. 5,001,472) are all cited to show devices and methods for improving the performance of data transmission in the telecommunication architectures, which are considered pertinent to the claimed invention.
